Figure 1. Czech Republic – simulation results

![Czech Republic: primary surplus](image1)

- early accession, high growth
- early accession, low growth
- late accession, high growth
- late accession, low growth

Figure 2. Hungary – simulation results

![Hungary: primary surplus](image2)

- early accession, high growth
- early accession, low growth
- late accession, high growth
- late accession, low growth
Figure 3. Poland – simulation results

Figure 4. Romania – simulation results
Figure 5. Simulation results: Czech Republic, high growth, with costs of reforms and the EU transfers

Figure 6. Simulation results: Czech Republic, low growth, with costs of reforms and the EU transfers
Figure 7. Simulation results: Hungary, high growth, with costs of reforms and the EU transfers

Figure 8. Simulation results: Hungary, low growth, with costs of reforms and the EU transfers
Figure 9. Simulation results: Poland, high growth, with costs of reforms and the EU transfers

Figure 10. Simulation results: Poland, low growth, with costs of reforms and the EU transfers
Figure 11. Simulation results: Romania, high growth, with costs of reforms
